Seasons Greetings!

As we wrap up 2025, we want to say a sincere thank you to everyone who has supported Digital4Security this year, from our consortium partners and stakeholders to the wider cybersecurity and digital skills community. Your engagement and collaboration have helped us build

strong momentum. We look forward to sharing more in the months ahead and to continuing this journey together in the new year.

Digital4Security key updates

Digital4Security Taster Workshops

The Digital4Security Taster Workshops offer a unique opportunity to explore key cybersecurity areas, from cybersecurity management and data sovereignty to cloud security and enterprise architecture.

Join the Digital4Security Taster Workshops to:

- ✓ Learn directly from leading cybersecurity experts
 - ✓ Gain practical skills through real-world, interactive workshops
 - ✓ Receive a certificate of completion and a 10% discount on the full Master's programme (by attending at least 4 of 8 workshops)
 - ✓ Expand your professional network across Europe's cybersecurity ecosystem
- 📢 Stay tuned! More details on the Taster Workshops, dates, and registration will come in January 2026.

Spotlight on Cybersecurity in Industry

Q&A with Professor Paolo Trucco

The module Cybersecurity in Industry – Security of OT and Cyber-Physical Systems explores how cybersecurity and industrial safety performance are deeply connected.

We hear from Professor Paolo Trucco, who explains why protecting safety-critical and mission-critical systems is essential as automation and digitalisation transform modern industry.

New Blog Post

Why 2026 Is the Year of the Cyber Defender

For the first time in decades, defenders may gain an advantage — but only if they adapt quickly.
